

# Want to buy a hippo for your school?

***“All you have to do is log into Hippo- it tells you what needs to be done and how to do it. And you don’t need to be a rocket scientist to figure it out”***

**-Edgar Throop, maintenance supervisor at Frontier School Division**

HippoFM is a web-based software specializing in school maintenance that makes it easier to maintain multiple properties and avoid costly breakdowns and repairs.

Our system is an intuitive web-based software that provides a powerful demand and preventative maintenance work order management tool, comprehensive reporting system, and integrated Hippo Resource Library to ensure effective strategy that will increase the life cycle of your facility.

We use architectural drawings of new or existing facilities, and presents your data in a graphically-based

manner (of your floor plans) rather than in a spreadsheet format.

The software was built from the ground up with guidance from our end users.

HippoFM continuously grows with our clients’ changing requirements and environment. Our core product offering is simply the most robust CMMS system in today’s market, bar none. Facilities Management is not just for directors anymore-CMMS has to be fast, powerful and accessible from the web for all types of departments, such as data clerks, housekeeping, janitorial, facility

maintenance, teachers, division headquarters and external contractors.

Depending on the amount of locations in your division, you can be using HippoFM for as little as \$15/month for unlimited access to all of the following modules: Facilities and Fleet management; water and waste treatment plant module; capital planning and project management;; handheld and portable devise use; infection prevention and control module; warehousing and inventory module; and tenant and property management.
