

# HIPPO FOR HEALTHCARE

Patient protocols to follow, hazardous areas to manage, government regulations to adhere to and buildings to maintain - we understand managing and multi-tasking in the Healthcare sector. That's why we created HippoFM.

From patient rooms to physical plant crawl-spaces, HippoFM helps you streamline the scheduling and workflow of maintenance operations for optimized performance outcomes.

## Infection, Prevention and Control

**Protect your staff and your organization against the inherent dangers of working near hazardous areas.** Through the use of HippoFM's built-in IP&C module, easily attach proper protocols directly to work orders. Enabling federal guidelines, the IP&C module provides checklists and tasks that are to be completed before, during and after all activities.

## Accreditation and Capital Planning

**Gain accreditation and manage capital funding.** With a few clicks of the mouse, automatically generate comprehensive maintenance and inventory reports that will assist in planning your annual capital budgets. Provide proof of productivity and maintenance operations. Pre-schedule essential reporting and distribute it to individuals and departments — never forget a report again.

## Reduced Maintenance Costs

**Preventative maintenance schedules - your library or ours.** At Hippo we understand that the proper care of facilities can make a difference in the success or failure of your organization. Maintaining the optimal working condition of all assets by creating weekly, monthly and yearly preventative maintenance schedules will reduce your costs and liabilities. With HippoFM as your guide, take the right steps to maximizing the lifespan of your facility's assets and optimizing your maintenance dollar.

## Simply Superior CAD Power

**CAD graphics, simple and easy-to-use.** At HippoFM, we understand your focus needs to be on fostering a clean and safe environment. By utilizing HippoFM's powerful CAD Graphic Interface preventative maintenance is a breeze. With Hippo's powerful CAD mapping, existing floor plans are used rather than a spreadsheet database model. Receive the work, assign the work and complete the work - and view status in one simple list or map view.

## Clear Cut Communication

**It's that simple.** If you've ever played the telephone game, you know that the message at the end is never the same as the beginning. In organizations, this communication barrier decreases productivity. HippoFM's web-enabled application increases quality communication by allowing unlimited users to interact through a central portal that is timely, direct and efficient. We cut out the noise of the middleman: work requests are routed instantly to the right resource and the work is completed on time.

### Cloud-Based Updates

HippoFM updates itself automatically - you will always have the newest version.

### Backup and Security

True 128-bit secure encryption and backed up twice a day - everyday!

### Web-Based SaaS

Hippo's Software as a Service is web-based and requires no setup or installation.
